

# THRIFTY POP 8

## Eight Ounce Popper

The Thrifty Pop 8 is a real work horse with its 1250 watt Hard-Coat anodized aluminum kettle producing 147 one-ounce servings per hour. Stainless steel and aluminum construction, side-hinged kettle and tempered glass panels provide for easy cleaning and exceptional durability. The Thrifty Pop 8 is ideal for environments that require high output without taking up much space due to its small 20" wide by 14" deep footprint. The stainless steel warming deck is heated by a 50 watt element that will keep popcorn warm and fresh for long periods of time.

This full-featured machine also includes a removable clean-out tray for easy cleaning and an old-maid drawer to catch the un-popped kernels. The Thrifty Pop 8 utilizes a 50 watt R20 presentation lamp to highlight the popped corn for added impulse sales. The simple two-switch operation makes it easy to operate. The Thrifty Pop 8 will cycle in approximately 3 minutes and produce 147 ounces of popped corn in an hour.

### IDEAL FOR:

**Convenience Stores, Churches, Skating Rinks,  
Concession Stands, Bars and Community Clubs**

### Three-year Warranty Program

Standards: UL - CSA - NSF - CE
